

WiSACWIS Release 3.4 Notes

Activity Notes

3229	Supervisor can't create correction note	Supervisors now have ability to do correction notes for workers narrative, even if they don't have an assignment to the case/provider.
------	---	--

Activity Notes

3872	Add 2 new fields to designate Face-to-Face contact	There are two new fields on the Case Note Window that are enabled when specific categories are selected. Face-to-Face Contact Type and Face-to-Face Contact Result are the two new fields.
------	--	--

The Face-to-Face contact field will be enabled, and required, when one of the following case note categories are selected:

Adoption
Initial Assessment
Family Assessment
Ongoing Services
Safety Services
Legal
Medical

It will also be enabled through Create>Case Work> Assessment>Assessment Contact or Initial Face-to-Face Contact.

The Face-to-Face Contact Type field will have the following values:

Worker / Child Contact In-Home
Worker / Child Contact Out-of-Home
Other / Child Contact In-Home
Other / Child Contact Out-of-Home
Not Applicable

When one of the above values are selected, except for Not Applicable, the Face-to-Face Contact Result field will be enable, and required, with the following values.

Scheduled / Contact Occured
Scheduled / Contact Did Not Occur
Unscheduled / Contact Occured
Unsheduled / Contact Did Not Occ

------	--	--

Process Payments & Purchase Requests

3036	Payment Download	An error message will prompt user to enter numeric check numbers only (since it cannot handle alphanumeric characters) on the Payment Download Screen in the Check Number Range fields.
------	------------------	---

WiSACWIS Release 3.4 Notes

Process Payments & Purchase Requests

- 3317 Capturing Payment request when provider rate chang When there is a retroactive provider specific rate change the nightly process that captures payment requests (calc ongoing batch) will now be able to capture the correct information. However, if this new rate change interrupts chronological order, the rates will need to be added again.

Example:

If you had a rate for a provider similar to the following:

Effective Date	Rate
01/2001	100.00
10/2001	150.00

You then realize that there should be a rate change effective 06/2001 at a rate of 125.00. Since this effective date interrupts the existing chronological dates. Any rates with effective dates after the 06/2001- the newly added rate- need to be added again. So your online would look like the following.

01/2001	100.00
10/2001	150.00
06/2001	125.00
10/2001	150.00

Ticklers

- 3569 Perm plan due tickler If a perm plan exists for a participant and a Legal Status is created with a 'Date Order Entered' and the checkbox verified, a perm plan tickler will not generate erroneously.

Voluntary Services Referrals

- 2418 Initial focus, Services Intake window. The focus is set on the Type field when creating a Services Intake.

Worker Assignment

- 3298 System allows 2 primary assignments When closing an assignment, the system will not allow a Primary Assignment to be opened if there is already a Primary Assignment for the case.

WiSACWIS Release 3.4 Notes

Worker Assignment

3540	Closing multiple open assignments	If a worker has multiple open assignments to the same case, the duplicate assignments can now be closed even if there are pending approvals.
------	-----------------------------------	--
